Redesigning Churches - creating spaces for connection and community

Kim Miller
\$19.99

As campus designer for Ginghamburg, Kim Miller has observed that when a church gets serious about Jesus’ call, there is always a design element to be addressed. Kim asserts that physical space transformation is simply a backdrop for authentic people transformation. Change the space and the opportunity and environment to change the world emerges. This comes as a fresh challenge for churches and ministries struggling to present a new look to match their relevant message. An emphasis on spatial design is an incarnation of Jesus’ call for new wineskins and is emerging as a key means to create community and the opportunity for transformation for a creative generation. This book is a practical guide for church leaders to transform their physical space into a ministry asset. Filled with pictures, tutorials and stories of spaces and lives transformed, *REdesigning Churches* offers close-up snapshots of design-on-a-dime style looks, providing readers with usable ideas and how-tos that are supported by stories of real-life change from Ginghamburg’s diverse community and the many congregations with which Kim consults.
